

DC Voltage Probes

Features

- Accuracy: 2% of Full Scale
- 100:1 voltage divider allows measurement of high DC voltages
- Capable of measuring DC voltages up to 700 VDC
- Adapter cable (included) connects to QUIKLOOK cable sets or directly to the QUIKLOOK Systems
- Approved for safe use on heavy-duty motors per IEC 1010, Category III
- Power: 4 AA cells

The Teledyne LeCroy Test Services (TLTS) QUIKLOOK Systems have long been able to measure AC electrical power. Now, the Teledyne DC Voltage Probe extends QUIKLOOK 3 power measurement capability to DC valves as well.
